COHORT

growr.

Today, a quarter of the world's adult population does not have an account. Most of the unbanked population do not have a "job" – they are smallholder farmers, micro-entrepreneurs or self-employed, and they are all facing a staggering financing gap of over US\$5 trillion per year.

Company Brief

Growr helps micro-entrepreneurs build their self-sovereign credit record and receive fair productive loans without over-collateralization, bringing real-world yield to the decentralized finance protocols in the Bitcoin ecosystem.

Despite the exponential growth of the security token industry, secondary market liquidity is still absent due to the lack of licensed market makers and nascent stage of the industry

IX Swap

Corporate Sprint Accelerator 9

Company Brief

IX Swap is the world's first hybrid exchange platform that provides liquidity pools and automated market-making (AMM) functions purpose-built for regulated digital securities like security tokens (STOs).

The platform is the first TradFi-DeFi bridge that facilitates the trading of digital securities via licensed broker-dealers and custodians across jurisdictions.

80% of companies have control deficiencies in their cash cycle. Neither accounting software nor corporate banking platforms have yet managed to solve this. The rise of cryptocurrencies and CBDCs add further complexity and fragmentation to an already convoluted mix of software packages.

Volve's mission is to fix inefficiencies at the interface of banking, crypto and accounting systems. We are building an all-inone payment rail-agnostic system to fully automate business' fiat and crypto payment processes and related internal controls using advanced data analytics and AI.

Money laundering and financial crimes are more and more affecting countries and businesses in terms of security, transparency and promotion of a prosperous development. Moreover, Customer Due Diligence (CDD) activities required from several categories of businesses cause high costs, waste of time, risk of sanctions and friction with customers.

Company Brief

Mopso is a RegTech startup that supports financial institutions in the fight against money laundering. Thanks to the development of two highly integrated solutions, Mopso addresses compliance with anti-money laundering regulations while doing assessment and identification of potential critical connections among customers.

Upsure solves the problem of disjointed systems in Insurance that cause functional silos. Upsure unifies all Insurance functions and product lines (Life, P&C, Group or Individual) into one digital platform for easy selling, faster servicing and deeper customer engagement

Company Brief

Upsure is founded by Insurance industry veterans, to address the huge gap in the market for end to end solutions for digital transformation at low costs. Upsure is modular, clients can start with just one piece, go all the way if they want to, each piece is standalone or could merge with others. We target B2B Insurance businesses that struggle with B2C problems such as insurance companies, brokers, banks, corporate customers agents, web aggregators etc.

The sustainable investment market is experiencing a "green gold rush". The rapid growth also comes with growing pains and urgent problems, such as greenwashing and increasing regulatory burdens. The financial institutions are overwhelmed by the strong regulatory push and huge demand pull from sustainability-conscious investors.

Company Brief

U Impact is a fintech startup with the mission to mobilise capital towards sustainability. We developed a solution to enable people to start investing sustainably as simple as shopping online or browsing for movies, and we are making it available as a white-label solution to fund managers, intermediaries, and financial advisors.
